

Desktop Goose

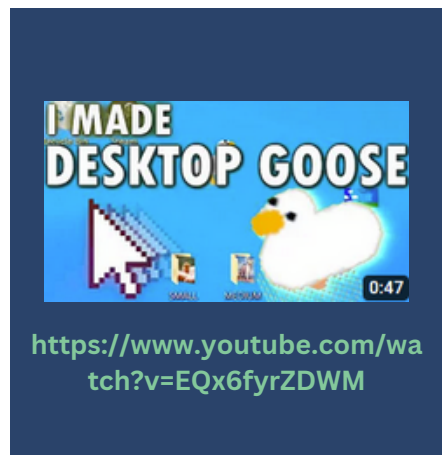

“HONK HONK, HEAR YE. I have created a goose for your desktop.

He'll nab your mouse, track mud on your screen... leave you a message, deliver you memes?

Play video games with a desktop buddy who will attack you if you poke him.

Fill out spreadsheets while your screen fills up with instances of Goose Notepad.”

As with any downloads on your computer, make sure you're downloading this from the original source! You should also do your research on any program before running in on a personal device. Have fun and stay safe!
